

SINISTER DUNGEONS

PAINTING GUIDE

SINISTER WALLS AND FLOORS

STEP 1

MOSS GREEN
(GT002-MG)

+

ARCANE ACID
(GT002-AA)

Apply areas of fungal moss into the cracks using a 2:1 mix of **Moss Green** and **Arcane Acid**.

STEP 2

BASALT BLUE
(GT002-BASB)

+

BLACK
(GT002-B)

Apply a heavy dry brush of a dark blue-black mix using an approximately 4:1 ratio of **Basalt Blue** and **Black**. The resulting mix should be very dark but still appear slightly bluish.

STEP 3

BLACK
(GT002-B)

BASALT BLUE
(GT002-BASB)

+

REGAL RED
(GT002-RR)

+

BASE GREY
(GT002-BG)

Paint the tops of any pillars **Black**. Paint the pillars with an approximate mix of 5:3:2:1 **Basalt Blue**, **Regal Red**, **Base Gray**, and **Black**. Just try to get a purplish gray. This will be covered partially by a future step, so exactness isn't strictly necessary.

STEP 4

WHITE
(GT002-W)

+

LAVA YELLOW
(GT002-LY)

+

DEEP WATER GREEN
(GT002-WG)

Using an approximate mix of 3:2:1 **White**, **Lava Yellow**, and **Deep Water Green**, dry brush the upper parts of each piece, as well as the edges of floor tiles and corners. Make the tops and edges heavier and lighten the dry brush pressure as you work your way down the piece.
